Seidor: A Unique Provider of Comprehensive ICT Solutions

Seidor is a leading system integrator that stands out in the industry by offering unparalleled end-to-end ICT solutions. With a rich legacy spanning thirty years, the company has built a strong reputation for delivering exceptional information and communications technology services on local, regional, and global scales across a wide range of industries.

At Seidor, we take pride in our ability to design, implement, manage, and train technology solutions tailored to the unique needs of various sectors. While our focus remains on the MENA Region, we have established offices in the UAE and KSA, strategically positioning ourselves to cater to the specific requirements of this dynamic market.

With a robust foundation supported by strong balance sheets and an impressive team of 6,000 highly qualified resources, including 1,500 experienced consultants dedicated to providing SAP-based solutions, we are well-prepared to tackle even the most complex and scalable projects in the region.

What sets Seidor apart is our flagship capability in SAP, which forms the backbone of our operations. With twenty-five industry solutions meticulously crafted for small and medium-sized businesses (SMEs), we offer a comprehensive suite of services.

As a company, we prioritize the timely and budget-friendly delivery of projects, emphasizing the utmost quality of service. Our commitment to excellence is ingrained in our business values, ensuring that each project we undertake is completed with the highest standards of professionalism and efficiency.

Furthermore, Seidor is not just a technology consulting firm; we offer a diverse portfolio of solutions and services. From comprehensive consulting and implementation to development, maintenance of applications and infrastructure, and outsourcing services, our expertise covers a wide spectrum of technological needs.

Our global reach is extensive, with direct operations in 39 countries and a customer base of over 8,000 satisfied clients. In 2014, Seidor expanded its presence in the MENA region, establishing its regional head office in Dubai, UAE. Since then, we have grown exponentially, and currently, we boast eight offices in the region to meet the increasing demand for our deep expertise in technology, strategy, and advisory.
